

## WAY TO MAKE YOUR SCHOOL E-MATURE AND OPEN

THE BENEFITS OF USING THE R4C SELF REFLECTION TOOL AND IMPLEMENT CHANGES BUILT AROUND THE RESULT

**23 JUNE - SPECIAL WORKSHOP**  
OF THE EDEN 2021 VIRTUAL ANNUAL CONFERENCE

The workshop aims at bringing together policy makers, teachers, school leaders, researchers and representatives of the K12 sector of education on wider benefits of making their schools digitally mature, open and innovative.

Participants will examine how schools can be supported in using self-reflection tools to understand the current position of the school as a learning organisation and build on the results to define and implement a concrete set of actions by providing a step-by-step support mechanism for school heads and teachers.

The event will consist of presentations of the Reflecting 4 Change project results so far, followed by a panel of experts and interaction with the audience.

### PRESENTERS

**Sofoklis Sotiriou**, Elliogermaniki Agogi, Greece  
**Nikos Zygouritsas**, Elliogermaniki Agogi, Greece  
**Menelaos Sotiriou**, Science View

## EDEN 2021 VIRTUAL ANNUAL CONFERENCE

“LESSONS FROM A PANDEMIC FOR THE FUTURE OF EDUCATION”

**EDEN 2021**  
**VIRTUAL ANNUAL CONFERENCE**  
21-24 June 2021

Hosted by

Madrid, Spain

The gradual transition from traditional classroom-based education to online teaching and learning has been accelerated by the global crisis caused by the COVID-19 pandemic. The crisis has forced educators to reappraise their roles, professional practices and beliefs.

EDEN has a long history of supporting educators in online and distance education, providing a forum for discussion, learning, and refinement of best practices in this area. This pandemic has been no exception. This year's conference is intended as a continuation of the efforts of EDEN to support educators by providing a space to explore the issues and insights that have emerged during the COVID-19 pandemic.

Not only does this conference provide attendees with the perfect opportunity to explore this range of topics but it also provides us with a space to reflect upon the role that online and distance education will have after the pandemic. As noted in our webinar series [#covid19 #onlinetogether Education in a time of a pandemic](#), fully online education on a global scale is unprecedented in the history of education. Today we are talking about the “new normal” and “future normal”.

What will this future look like? How can EDEN members help to shape it and bring their insights to bear?

The European Distance and E-Learning Network is co-operating with EDEN Digital Learning Europe MTÜ (Estonia), in order to sustain the legacy of the EDEN Association brand after the United Kingdom having left the EU, to ensure continuity of services and activities for the benefit of the European academic and professional community in open, distance and online learning.
